

PROJECT

SUPPORTING TOOLS AND EQUIPMENT FOR FIRST AID IN RESCUE OPERATIONS

BY

ACTING SUB LIEUTENANT KITTIPAT THIPSUWAN

CHAIRMAN OF THE THREE FOG DISASTER RESPONSE OPERATIONS AT PHU KKRADUENG POINT, LOEI

PROVINCE

Project name : Supporting tools and equipment for first aid in rescue operations

Principle and reason : Because the area in Phu Kradueng District consists of forests, mountains and creeks, Nong Klong Bueng. including agricultural areas The weather is hot, the weather is hot. With frequent forest fires, villagers in some villages have been plagued by wildfires that burnt crops that are a major source of income. Winter is cold. In the rainy season, there is heavy rain and people die from drowning. In addition, Phu Kradueng district also has important tourist attractions such as Phu Kradueng National Park causing a lot of traffic of people and tourists in the year Therefore, there is a high risk of accidents.

from such disasters Therefore, it is our origin to become a rescue volunteer. through training to increase skills, knowledge and experience in helping to prevent disasters and accidents from heavy to light By working to coordinate and support various agencies, including the government, police and public health departments. in the locality to reduce the burden of such agencies that may have various restrictions Acceleration to help the victims quickly and efficiently in times of need It is necessary to use both a well-trained volunteer team and a sufficient number of standard quality equipment.

Although the personnel who are volunteers in the Phu Kradueng district will have sufficient knowledge, capability and experience to perform the initial duties until the end of the process But there are also limitations in the equipment and tools necessary for rescue work from intensive access to the scene with a vehicle equipped with communication equipment. emergency signal equipment Tools to help and prevent recurrence including first aid equipment for between the medical and nursing team

in order to perform duties efficiently and in a timely manner The team therefore agreed to provide tools and equipment. as attached details

project objectives

1. To ensure the highest efficiency of the operations of the rescuers with tools and equipment that are of sufficient standard and quantity

2. Help relieve the burden of government agencies by being an outpost to access the scene urgently To reduce the risk of a double accident situation report and prepare a place to support various agencies to continue working with convenience and safety

3. For the safety of all volunteers while working including those in the area of the accident

4. To raise awareness of volunteer work for the people and society, whether volunteering in other activities

goals and utilization

8. Air compressor, JST brand, 1 unit, price per 1 unit 270,000 baht, total 270,000 baht The need for compressed air to enter for underwater rescue diving. and compressed air in tanks for firefighters

piston air compressor

product information

piston air compressor

- Air-cooled 4-stroke gasoline engine
- easy to carry
- The frame is made of stainless steel and is treated with a special color coating to make it resistant to marine

use.

- There is a device for drainage and wind in a manual condensate drain system.
- Compression rate of 100 liters / minute, can be added to the ability to compress air to both 200 and 300 bar.
- Compressed air quality meets EN12021 standard

Implementation period : 7 days

Volunteer members have a meeting to analyze problems in the past work duty for 1 day.

The rescue volunteers concluded from an analysis of problems arising from the lack of first aid and rescue equipment and a three-day search for tools.

Prepare a written project for a period of 3 days.

expected results

1. Victims are rescued by experienced rescue volunteers with safer and more effective first aid tools and equipment.

2. Create an impetus for new members to join the rescue volunteers for more public benefits.

3. The performance of salvage duties in a shorter and faster time due to the availability of experience and equipment.

4. Satisfaction and confidence of relatives, victims, sightseers and related persons

5. It is beneficial for medical treatment due to prompt and proper initial assistance.

Summary of past work
